Washington, DC 20554

**RE: ULTRA-WIDEBAND ET, Docket 98-153**

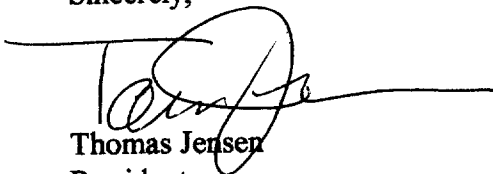

Dear Ms. Salas:

We make reference to our letter to you dated September 6, 2000 regarding ultra-wideband technology.

We believe that our position in this referenced letter makes it clear that we support the protection of GPS systems while urging support for testing of ultra-wideband technology. We believe our position is not unlike the position taken in the letter of March 28, 2000 to Chairman Kennard from the ATA and other aviation industry organizations.

In the interest of aviation safety, we wish to associate ourselves with the sense of that letter, which supports testing of new technologies while protecting the GPS system.

Sincerely,

  
Thomas Jensen  
President
